Profile Summary

- Results-driven Senior Engineering Lead with over **10+ years of extensive experience** in designing, developing, and deploying scalable web applications across diverse platforms and technologies. Proficient in front-end and back-end development using **Node.JS, ReactJS, Angular, JavaScript, HTML5, CSS3/SCSS/TailwindCSS, Bootstrap, MySQL, SQL, MongoDB**, and scripting with **Shell Script and Cronjobs**.
- Skilled in leveraging modern development tools and cloud platforms including **VS Code, Visual Studio, Postman, TeamCity, Keycloak, Docker, Workbench, SSMS, JIRA, Bitbucket, GitHub, Swagger, AWS** and **CI/CD Pipeline**.
- Demonstrated expertise in the entire **software development lifecycle**, from requirements gathering and architectural design to implementation and deployment.
- Adept at applying **design patterns** and best practices to deliver high-quality, maintainable code. Strong collaborator and problem-solver with a proven ability to manage multiple priorities, contribute to team success, and drive continuous improvement in fast-paced environments.

Work Experience

Persistent Systems Limited – Pune (HJ), India: March 2020 to till date

Senior Engineer Lead

- I have experience in the healthcare domain, working with instrument-generated data and building analytical dashboards with tables, filters, and charts for data visualization.
- Contributed to the development and successful delivery of a **credit card collection application for RBL Bank**. The project was completed on time and received excellent feedback from the team.
- Actively worked on Accelya's Agency Management module around 2.5 years and in this project got appreciation for the dedicated work.
- Actively worked on Report Module in Operative Media company.
- Actively participate on Golang, ReactJS, NodeJS Bootcamp Sessions

GOMO Group – Pune, India: Nov 2018 to Feb 2020

Sr. Software Developer

- Development and design according to Client Requirements and platform specific technical best practices
- Complete Application Life cycle and live support for CRM Projects
- Understanding of various domains/roles and create user type documentation and implementation
- Lead the development, deployment, design, testing, and acceptance plans for applications

CarvingIT pvt. Ltd.– Pune, India: Sept 2015 to Nov 2018

Software Developer

- Developed various applications from scratch, including designing database schemas and delivering complete solutions to clients.
- Handled end-to-end development, covering UI design, backend logic, and database integration.

Primary Skills

ReactJS
Node.JS
Angular
JavaScript
HTML5
CSS/TailwindCSS/SCSS
Bootstrap

Databases

MySQL
SQL
MongoDB

Cloud Solutions

AWS
CI/CD Pipeline

Operating System

Windows
Linux/Unix

Tools:

GIT
GitHub
VS Code
KeyCloak
Swagger
Visual Studio
Bitbucket
JIRA
Postman
WorkBench
DBeaver

Domains

Healthcare
Banking
Airline
Media
CRM

- Directly interacted with clients to gather requirements and implemented them effectively in the applications.
- Worked on multiple websites featuring modern UI designs and integrated various libraries and frameworks.

Project Details

I. RBL Bank – B2B Card Collection Application

Role: Development, Design and Database

RBL Bank is a well-known private sector bank with various modules to manage credit card data and operations. I worked on a B2B credit card collection application. Credit card data is assigned to agencies, which then allocate cases to agents and set collection target. Agents work on these cases and update the application with their progress. The B2B application supports different user roles, each with specific menus and features, such as adding/updating/deleting agencies and agents, viewing /uploading /downloading documents, and generating reports with filters.

Responsibilities:

- Developed REST APIs and handled **Node.JS CRUD operations**.
- Reviewed code and approved PR.
- Deployed the project on different servers using remote desktop.
- Worked with **AWS** and **built CI/CD pipelines**.
- Participated in daily stand-ups for enhancement and development.

Environment: AWS, TeamCity, third-party APIs, DMS - Data Management Server, Bitbucket, GitHub

Worked Tools/Technologies: Node.JS, ReactJS, HTML5/CSS, Material UI, VS code, MySQL, GIT, Postman, Swagger, TDD

II. Perkin Elmer – Lab Pilot Application

Role: Development, Design, and Database

PerkinElmer specializes in machines that measure elements in medical and food products. The application was designed to fetch and display analytical data from various modules of these machines. This data was presented in tabular and dashboard formats, with options for exporting detailed reports. The system supported both **single-tenant and multi-tenant** configurations, managed via a configuration database, and operated as a **hybrid application**-functioning locally with selective cloud features. Role-based access was implemented to manage functionalities such as **CRUD operations, document management (view/download/upload)**, and **report generation with advanced filters**.

Responsibilities:

- Implemented Micro-Frontend architecture to integrate data from local applications via APIs.
- Managed deployment across multiple servers using Hyper-V.
- Conducted code reviews and ensured quality standards.
- Set up and maintained both cloud and on-premises environments.

Environment: TeamCity, AWS

Worked Tools/Technologies: ReactJS, HTML5, TailwindCSS, Keycloak, Material UI, ECharts, VS Code, SQL, Git, JIRA, GitHub, VS Copilot, Postman

III. Accelya - Agency Management Application

Role: Development and Design

Accelya is a party of big Airline company, Accelya have developed application for manage airlines. This application has multiple modules, each module had big team, this application is used for managing airlines with his different agencies.

Agency Management module has different users, payment details, flight performance, plan process, deals, draft deals etc. Each deal and draft deals have different templates, forms, validations, comparisons, filters.

Responsibilities:

- Development issue, code review, front-end design.
- Developed tech stories and updated version.
- Daily communication with clients & Team support

Environment: AWS, Local cloud-based, Setup with server API

Worked Tools/Technologies: Angular12, ASP.NET, HTML5, SDK library, SCSS, VS code, GIT, Postman.

Education

Master of Business Administrator (MBA) - (07/2025 – Current Date)

Data Science and IT Management – Appearing

Bachelor of Engineering (BE) - (05/2010 - 04/2015)

Computer Science – First Class

Higher Secondary Certificate (HSC) - (05/2009 - 03/2010)

Science – Second Class

Secondary School Certificate (SSC) - (05/2007 - 03/2008)

Maharashtra State - First Class

Certifications & Awards

- **GenAI Foundation** - GenAI Assisted Coding using Amazon
- **GenAI Practitioners**
- **AI Prompt Engineering Certifications**
- **Lead, Motivate, Engage People** Certification
- Oracle, C++ Certification in Hyderabad
- Linux Workshop with Linux expertise
- Awarded **PSL Annual Award 2024** - “Most Valuable Player in Developer”
